The death of Mr F. G. Fowler makes it possible for the publishers to express their appreciation of the valuable share he contributed to the now well-known books of which he was part-author, and in especial of his skilful planning of the present work, which they believe will be considered a triumph of condensation. The great Oxford Dictionary, less than a tenth of which remains unpublished, is the ultimate source of most of the information contained in this modest compendium; which offers to general acceptance ascertained results of half a century of research. It is thus possible to claim for the little book unique authority among books of its size and price.

AUTHORS' PREFACE

THIS book is nominally an abridgment of the *Concise Oxford Dictionary*, but has in fact cost its compilers more labor, partly because the larger book was found not to be easily squeezable, and partly owing to changes in method unconnected with mere reduction of quantity. The one merit, however, that they feel entitled to claim for the C.O.D. has been preserved to the best of their power in the abridgment — that is, they have kept to the principle that a dictionary is a book of diction, concerned primarily with words or phrases as such, and not, except so far as is needed to ensure their right treatment in speech, with the things those words and phrases stand for. This principle, while it absolves the dictionary-maker from cumbering his pages with cyclopaedic information, demands on the other hand that he should devote much more space than that so saved to the task of making clear the idiomatic usage of words. The bad dictionary, on a word that has half a dozen distinct meanings, parades by way of definition half a dozen synonyms, each of them probably possessed of several senses besides the one desired, and fails to add the qualifications and illustrations that would show the presumably ignorant reader how far each synonym is coextensive with his word, and what is the context to which one or other is the more appropriate. To avoid this vice has been the chief aim of the C.O.D. and of this abridgment alike; but the smaller the scale of the book, the more difficult becomes the task.

Among the changes of method referred to above, three may be indicated.

1. A pronunciation system has been devised by which, with little expenditure of space, it is made clear how the

compilers recommend that every word should be pronounced; the C.O.D. assumption that pronunciation might be dispensed with for most words has been abandoned. An appendix to the dictionary contains the partly naturalized or other words in which non-English sounds are required.

2. Alphabetical arrangement of phrases within all long articles has been carried as far as possible; it was realized that such articles in the C.O.D. were fitter to be read through as wholes by interested students (not the treatment usually accorded to a dictionary) than to be referred to by persons whose chief object is to find a particular phrase without loss of time.

3. Etymologies have been cut down to little more than bare statements of ultimate origin; the function of etymology in a small dictionary is taken to be the merely negative one of saving the reader from imagining a connection between words that are in fact independent (between, e.g., *recover* and *cover*, *sola* topi and *solar* heat); that mistake may vitiate his conception of a word's meanings and must therefore be guarded against; to attach any value beyond this to the meager information alone possible in a small dictionary (if it is not to encroach disproportionately on the space needed for less pretentious but more essential matter) is a delusion. The brevity of the etymologies, then, with the consequent abstention from the titbits of desultory information usual in this sphere, is deliberate. It is hoped, on the other hand, that the derivations given are reliable; those of words contained in the considerable portion of the O.E.D. that has appeared between the publication of the C.O.D. and the present time (roughly, letters S, T, and V) have been revised into agreement with the O.E.D. conclusions; the etymologies for which O.E.D. authority is still lacking are those of words beginning with U, W, X, Y, or Z.

A minor improvement is the inclusion of a large number of words and senses not in the original C.O.D.; some of

these have been incorporated from the addenda list of 1914; and active service in France has brought the compilers acquainted with many war words deserving of record. Another minor point is an experiment in collecting words that form a series and letting the reader know where to find them; he may fairly expect to be told not only the meaning of an ox, an icosahedron, a quintet, a tercentenary, a genus, a major-general, demy paper, an obelus, or ruby type, but also what are the words for the ox of various ages and sexes, or for the other regular solids, army officers, marks of reference, and so forth, besides the one before him; an effort has been made to provide for this want by giving lists to which each word of such series contains a reference.

Directions follow for interpreting the pronunciation and the etymology attached to each word, after which a note on suffixes, one on inflection, and a list of special abbreviations, will conclude this preface.

F. G. F.
H. W. F.

PREFACE TO THE AMERICAN EDITION

In revising the *Pocket Oxford Dictionary* for the use of American readers, the editor has not attempted to alter in any essential way the general plan of the work as laid down by the Messrs Fowler. Apart from the authority derived from its connection with the great Oxford Dictionary, the peculiar value of their book lies in its compactness and its inclusion of much material not to be found in ordinary American dictionaries. In the revision, therefore, elimination of matter has been very sparing. Rather the task has been to make such changes in detail that the book may conform to American standards in spelling, pronunciation, and idiom; and where necessary to add material of special American interest and importance.

Alterations and additions have been largely of four sorts:

1. The so-called 'American spellings,' unrecognized in the English edition, are here introduced and given precedence. Thus the reader will find *center*, *defense*, *honor*, *plow*, and *traveler*, as well as *centre*, *defence*, *honour*, *plough*, and *traveller*. Similarly *connexion*, *gaol*, and *storey* have yielded precedence to *connection*, *jail*, and *story*.

2. Pronunciation has been revised in accordance with American standards, British usage being noted only when the variation is of particular interest (e.g. *clerk*, *lieutenant*). A distinctive phonetic symbol (ȧ) has been introduced to represent the vowel sound in words like *ask* and *path*. In the standard speech of the south of England and in some parts of the United States and Canada these words are pronounced *ahsk* and *pahth*. In America generally *ăsk* and *păth* are far more prevalent. Some American speakers

attempt to pursue a course midway between these extremes, and though their 'intermediate a' is often criticized as self-conscious and artificial it is widely used and is recognized in most American dictionaries. It has therefore been admitted here.

3. Definitions have been altered only when they seemed inadequate in content, or calculated to mislead or bewilder the American reader. In such cases they have been freely amplified or rephrased.

4. Many words and phrases have been added. Some peculiarly American terms like *squash* and *woodchuck* were listed in the C.O.D. and are here restored. Others have been gathered from the Oxford Dictionary and are classified as Americanisms and labeled 'U. S.' on its authority. Many more like *jitney*, *moron* and *escadrille* have come into use very recently from such sources as commercial and scientific life and the experience of the world war.

My thanks are due to Professor G. P. Krapp of Columbia University for many valuable suggestions and for his assistance in reading proof.

GEORGE VAN SANTVOORD

YALE COLLEGE
18 August, 1925.

PRONUNCIATION.

N.B.—The key at the foot of the dictionary pages summarizes these directions.

Phonetic respelling is placed in round brackets immediately after such words as require it, and the symbols in the PHONETIC SCHEME are primarily intended for this purpose. But respelling is often saved by employing the same symbols in the black type of the actual word; **bănĭsh,** for instance, has no respelling, and **dĭspōse** has only (-z).

Vowel symbols given in the Scheme with ¯, ˘, ¯, or ⌒, are also used without these marks to denote a vague indeterminate sound, which is almost identical for all vowels and (except in studied elocution) has no clear relation to the corresponding vowel marked ¯ &c. (e.g., the a in *about* is like the o in *reason, proceed,* and is not like ā or ă). When so used in brackets, the indeterminates are printed in italics, thus: **ago** (*agō*), **proceed** (prosēd), **particular** (*partĭkūlar*). Used in the actual word, they are recognized by the absence of the marks ¯, ˘, &c.; thus in **săcrament, cŏmmon, bĕggarly,** all the unmarked vowels (a, e; o; ar) are indeterminate. This does not apply to the last six symbols in the Scheme, which never have marks over them and are always distinct.

Indeterminate endings in -n, -m, -l or -le, when they require respelling, are also represented thus: **poison** (-zn), **fūsion** (-zhn), **tĕnsion** (-shn), **ōcean** (-shn), **lĭsten** (-sn), **bosom** (bo͝ozm), **hŭstle** (-sl), **offĭcial** (-shl), **weasel** (-zl), the vowel sound being that similarly indicated by the actual spelling of *spasm, prism,* &c.

PHONETIC SCHEME.

Consonants: b; ch (*chin*); d; dh (*dhe* = the); g (*go*); h; j; k; l; m; n; ng (*sing*); ngg (*finger*); p; r; s (*sip*); sh (*ship*); t; th (*thin*); v; w; y; z; zh (*vizhn* = vision).

Vowels: ă ĕ ĭ ŏ ŭ o͝o (mate mete mite mote mute moot)
ă ĕ ĭ ŏ ŭ o͝o (rack reck rick rock ruck rook)
ār ēr ĭr ōr ūr (mare mere mire more mure)
är ēr ôr (part pert port)
ah aw oi oor ow owr (bah bawl boil boor brow bower).

Vowels marked ˣ may be pronounced either way, e.g., **pătron** (pā- or pă-). In all vowel symbols with r (ār, är, &c.), the r, besides influencing the vowel sound, has its consonantal trill when followed by a vowel in the next syllable of the word or in the following word (in *fearing* but not in *fearful,* in *far away* but not in *far gone*).

ACCENT.

The main accent is shown by the mark ′, usually placed at the end of the stressed syllable; but, division into syllables being arbitrary in English, positions for the accent that would disguise the pronunciation are avoided; thus **stärr′y** but **că′rrў, pŏll′en** but **cō͝ol′ĭ, lōc′al** but **vĕlŏ′cĭtў, ōv′er** but **co′ver** (kŭ-), **ärch′erў** but **ärc′hetўpe** (-kĭ-),

mŭdd'ў but **mŭd'dle.** The placing of two accents on a word means either (*a*) that the two marked syllables are equally stressed, as in cord'uroy', opp'ortune', or (*b*) that among good speakers the one accentuation has as many adherents as the other (so bell'icose', viv'isec'tion), or (*c*) that the stress varies according to position in the sentence as explained in the dictionary article -ED. In the thousands of compounds given under their first elements among the alphabetically arranged combinations, accent is thus shown: if there is no hyphen separating the parts, the accent is always given (back'ground, backstairs'); if there is a hyphen, the regular usage is for the first of the compounded words to be stressed, and no accent is then given (oak-apple); if the stress falls, contrary to this rule, on the second component, it is marked (dead-beat'); if the stress is variable, each part has an accent (well'-inten'tioned).

PRONUNCIATION WITHOUT RESPELLING.

All the further information necessary for the pronunciation of any word or part of a word that is not respelt is contained in the following six paragraphs; the assumptions made in these hold unless the contrary is shown in brackets.

1. Any letter or combination in the Phonetic Scheme has the value there shown; e.g., aw as in *awl*, not as in **awake** (awāk'); and **ginger, linger,** would be required to rime with *singer* unless **ginger** were followed by (-j-), and **linger** by (-ngg-).

2. The following additional symbols are used in the black type:
å = ah or ă or sound intermediate between these (**åsk, páth**)
ė = **ĭ** (**nāk'ėd, rėlў', cŏll'ėge, prĭv'ėt**)
ûr, ŭr, = ėr (**bûrth, bŭrn**)
ў, ў, = **ĭ, ĭ** (**implў', sŭnn'ў**).

3. Final e unmarked is not indeterminate, but mute (**sāne, indŭc'tive;** cf. **rē'cīpė, dīlėttăn'tė**).

4. A doubled consonant is pronounced as single (**sĭll'ў, mănn'ĭsh, bŭtt'er**), not as in **cōōl'ly** (-l-lĭ) or **thĭn'nėss** (-n-n-).

5. The following combinations and letters have the values shown:

Vowels.

ae = ē (aegis)
ai = ā (pain)
air = ār (fair)
au = aw (maul)
ay = ā (say)
ea, ee, = ē (mean, meet)
ear, eer, = ėr (fear, beer)
eu, ew, = ū (feud, few)
ie = ē (thief)
ier = ėr (pier)
oa = ō (boat)
ou = ow (bound)
oy = oi (coy)

Consonants.

c is 'hard' and = k (cob, cry, talc), but
c before **e, i, y,** is 'soft' and = s (ice, icy, city)
dg = j (judgment)
g before **e, i, y,** is 'soft' and = j (age, gin, orgy)
n before **k,** 'hard' **c, q, x,** = ng (zinc, uncle, tank, banquet, minx)
ph = f (photo)
qu = kw (quit)
tch = ch (batch)
x = ks (fox)

6. The following terminations have the values shown:

-age = -ij (garbage)
-ate = -it or -*at* (mandate)
-ey = -i (donkey)
-ous = -*us* (furious)
-sm = -zm (atheism, spasm)
-tion = -shon (salvation)
-ture = -*cher* as well as -tūr, esp. in common words.

ETYMOLOGY.

The source of each word (or group of words contained in one article) is shown in square brackets at the end of the article; a pair of empty brackets in this position means that the source is unknown or disputable; entire absence of square brackets directs the reader to the last article that has had them, and [foll.] similarly directs him to the following article.

The name of a language (or of the abbreviation used for it, as Malay, Du. for Dutch, Gk for Greek, F for French) is often the whole contents of these brackets, and means that that is the language to which the word or its elements can be traced with some certainty, and beyond which its history is unknown. It does not imply that the word has come direct from that language into English; e.g., a word that has passed from Greek into Latin, from Latin into French, and from French into English, is described as [Gk].

To this statement of the language of origin is often added either (1, printed in italics) the actual form of the word or its chief element in that language; (2, printed in roman type) its literal meaning in that language, or a brief indication of the sense-connection; (3, printed in small capitals) a kindred word in English, especially when the origin is Teutonic; or (4) the qualification wd (= word), as [F wd], [It. wd]; this last form is used when a word, even if partly naturalized, is still recognizable as foreign by its spelling or pronunciation; it is to be taken as an intimation that the language mentioned is not necessarily that of the word's ultimate origin, but not as a guarantee that the foreign spelling has been exactly preserved in English (*commissionaire*, F *-nn-*).

When the contents of the etymological brackets neither begin with nor consist of the name of a language, the language of origin is that of the word or words printed either in italics or in small capitals; italics are used when no more is needed than that the reader should know that his word is formed from the italicized word or is another form of it; small capitals imply that he will find the etymology in the square brackets attached to the word so printed; this serves the two purposes of saving repetition and drawing his attention to the fact that the words are related. For compound words whose first element is a prefix treated in an article (ex-, per-, &c.), the removal of which leaves a complete English word (*ex/tradition*), reference is often made only to the prefix (ex-) or to the main element (tradition), the reader being left to consult the other word if he chooses.

Of the words marked [E], i.e. English, the great majority are known to have been in use (though seldom in precisely the same form) from the Old-English or Anglo-Saxon period, and to correspond to similar words in other Teutonic languages; but the same description is ap-

plied to words whose history cannot be traced so far back if they have been established for some centuries and there is no reason except the want of evidence to doubt their being native. The form [E, = so-and-so] is used when the word's original meaning was different from its modern one (*Lent*), and again when it was in Old English a compound (*lady*). It should be observed in general that the language names (F, L, &c.) are given in this book (with one exception) the widest possible sense; no distinction is made between old and modern French, or classical and medieval Latin, F and L including all periods; the one exception is N, which stands only for Old Norse, the language of Norway and its colonies to the 14th century.

The forms [person], [place], [imit.], [native], [U.S. wd].

[person], [place], mean that the word or its chief element was originally the name (which is given if necessary) of a person or place. [imit.] means that the word was made in imitation of the sound associated with the thing it serves to name, or that it is held to be suggestive of it by its own sound. [native] means that the word is the received spelling of the name by which the thing is known among the people or in the place referred to in the definition. [U.S. wd] means the word originated among the English-speaking population of the United States, but does not imply its currency is now necessarily limited to America.

[Teut.], [Scand.], [Celt.], [Rom.].

These and other words standing not for single languages, but for families of languages, are used only when it is certain that a word has come originally from one of the branches of such a family, but impossible to choose with certainty among them.

A reference to a passage in the Bible or a well-known author ([*Rev.* iii] for *Laodicean*) is given instead of an etymology when the connection between sense and origin is unintelligible without it.

No etymologies have been offered as uncertain or conjectural or probable; plausible guesses at the origin of words, if they are seriously open to doubt, have not been recorded; and, if there is very little doubt of their truth, are presented as certainties.

NOTE ON SUFFIXES.

Short articles on the suffixes of which a list is given below are inserted in their alphabetical places, not by way of etymological instruction, but to save the repetition involved in defining words that do not need it. A small number of these suffixes stand apart from the rest as being attachable with absolute freedom to any English word fulfilling certain conditions, without regard to whether it is known ever to have had the suffix attached to it before or not. These are *-ly*, *-ness*, *-er* of the agent, *-er* and *-est* of comparative and superlative. *-able*, *-ish*, *-less*, and *-like*. *-ly* may be added to any adjective (subject to the reservation that it is usually avoided when the adjective itself ends in *-ly*, giving forms like *holily*); *-ness* to any adjective (even when there is a more familiar noun of another form. *humility* does not preclude *humbleness*); agent *-er* to any transitive verb, though many verbs prefer *-or* (but *abetter* is not wrong because

abettor is right); *-er* and *-est* to any monosyllabic adjective admitting of degrees that is not stated to have irregular comparison; *-able* to any transitive verb (though it is avoided when the verb ends in *-ble, -cle, -ple,* &c., and often exists only as a possibility beside an established form in *-ible—defendable* beside *defensible*); *-ish* to any adjective or noun; *-less* (without) and *-like* to any noun. The words in *-ly, -ness, -er* (agent), *-er* and *-est, -able, -ish, -less,* and *-like,* are therefore not recorded in the dictionary except for special reasons; e.g., when a question of spelling arises (as in *debatable, openness, generally, notably, palish*), or when the sense is abnormal (as in *hardly*); on the other hand, the reader is always informed when a verb has (or would naturally have) an agent-noun in *-or* rather than *-er,* when an adjective of more than one syllable uses *-er* or *-est* as well as *more* and *most,* and when a verb has an adjective in *-ible* preferred to that in *-able.* About all these nine suffixes, however, it is to be assumed that the forms ending with them may be made from all appropriate words even when they are not recorded, and such recording is not done except for special reasons.

With all the other suffixes in the list below the case is different; words ending with them are recorded if they are in current use, and if they are not recorded are to be taken as non-existent or at any rate not current; but, unless there is some modification of sense requiring notice, they are merely recorded, and not defined, and the reader is left to ascertain their meaning by consulting the suffix article; thus *distraction, department, declination,* all have senses not inferable from the meanings of the verbs and the suffixes involved, and are therefore defined; but *distortion, debouchment,* and *decapitation,* can be recorded without definition.

The list of suffixes explained in their dictionary places is:—*-able, -ac, -aceous, -acy, -al, -an, -ar, -ary, -ate, -ation, -bility, -cle, -cracy, -crat, -cratic(al), -cule, -dom, -ed, -ee, -en, -er* (agent), *-er* and *-est, -ery, -ess, -faction, -ferous , -fic, -fication, -fold, -form, -ful, -fy, -graph, -graphy, -hood, -ible, -ic, -ician, -ics, -ine, -ion, -ish, -ism, -ist, -ive, -ize, -kin, -less, -let, -like, -ling, -logy, -ly, -mania(c), -ment, -meter, -metry, -mo, -nce, -ncy, -ness, -nt, -oid, -or, -ory, -ose, -ous, -phil, -phobe, -phobia, -proof, -ry, -ship, -teen, -th, -tude, -ty, -ule, -ure, -ward(s), -ways, -wise, -y.*

INFLECTION.

The normal inflected forms of words are not set out in the text except for special reasons. In the following rules of formation, the term ' sibilants ' stands for words ending in -s, -x, -z, -sh, or soft -ch, ' -o wds ' for all that end in -o, ' -e wds ' for all that end in mute -e, and ' -y wds ' for all that end in -y not preceded by a vowel (e.g., *deny, puppy,* but not *pray, donkey*).

1. Plural of nouns. Sibilants add -es (*churches*); -y wds change -y to -ies (*ponies*); -o wds' plural is always stated thus, **potato** n. (pl. *-oes*), **photo** n. (pl. *-os*); other nouns add -s (*cups*).

2. Possessive of nouns. Singular nouns take apostrophe, s (*man's, James's*); plurals, if they do not end in s, form the possessive by the same rule (*men's, geese's*), but, if they end in s, take an apostrophe only (*soldiers'*).

3. Comparative and superlative of adjectives and adverbs. In monosyllables -er, -est, are added (*bolder*), -e wds dropping the e (*purest*); if other words use -er and -est, or if the final consonant is doubled, it is stated in the dictionary, thus: **serene** a. (*-er, -est*), **grim** a. (*-mm-*).

4. Third person singular present of verbs. Sibilants and -o wds add -es (*wishes, goes*); -y wds change -y to -ies (*flies*); other verbs add -s (*dips*).

5. Past and p.p. of verbs. -e wds add -d (*divided*); -y wds change -y to -ied (*buried*); other verbs add *-ed* (*vetoed, hunted*); if the final consonant is doubled, it is stated in the dictionary, thus: **clip** v.t. (*-pp-*); if two spellings are current, one with a single consonant and one with doubling, it is indicated thus: **level** v.t. (-l-, -ll-).

6. Participle of verbs. All verbs add -ing (*playing*), -e wds dropping the e (*coming*); doubling of the final consonant is stated as in 5.

7. Archaic 2nd and 3rd sing. of verbs. The forms in -(e)st and -(e)th, being archaic, need only be mentioned, without rules; -(e)st is 2nd sing. present and past, -(e)th is 3rd sing. present; examples are *playest, dost, hear'st, madest, wouldst, saith, goeth.*

ABBREVIATIONS.

In any article, when the word treated in it is to be quoted or mentioned, its initial letter followed by a period is used instead of the whole word; this stands only for the exact form that heads the article; e.g., in the article **court,** *c.* stands for *court* (noun or verb), but neither for any inflected part of the verb or noun (as *courted, courting, courts*), nor for any of the derivatives (*courteous, courtesy, courtesan, courtier, courtly, courtship*) included in the same article; but the plural of a noun is quoted by the initial doubled (here *cc.*), and any compound that there is occasion to quote (as here *court-martial*) may be represented by the two initials hyphened (*c.-m.*).

A list of particular abbreviations used in the text follows. Notes on the asterisked items are given below the list. The addition of *&c.* to the completion of an abbreviation means that it may be used not only for the exact form given, but for connected words or phrases; e.g., *chem./istry &c.* means *chemistry, chemical, chemically, in chemistry; adj./ective &c.* means *adjective, adjectival, adjectivally*; *assim./ilation &c.* means *assimilated* as well as *assimilation.*

Abbreviations printed in the list in small roman type usually appear so in the text, but may on occasion be in italics, and in certain positions they regularly begin with a capital letter.

NOTES ON WORDS MARKED * IN ABOVE LIST.

abs.: a verb used abs. is a transitive verb with no object expressed, as in ' If looks could kill '; an adjective used abs. is without a noun to agree with, as in ' the rich,' ' in vain.'

attrib. and pred.: an adjective is used attributively when it is attached in the ordinary way to a following noun, as in ' a good man,' ' good men '; predicatively, when it serves as complement to a copulative or factitive verb (' The man is good '; ' I call him good '), or is placed after its noun so as virtually to make a statement additional to that made in the sentence (' uttered curses not loud but deep '); most adjectives can be used either way, a few can only be attributive (as *our, my, stray, bounden*), and many can only be predicative (*ours, alone, aloft, desirous, devoid*).

Celt.: the Celtic family of languages includes Gaelic (Irish, Scottish, and Manx), Welsh, Cornish, Breton.

esp.: a particular use of (esp.) is important; when a derivative has various senses of which some can be deduced from that of the main word, but others not, (esp.) is prefixed to remind the reader that the special senses do not preclude the ordinary ones.

Hind.: Hindustani is Hindi (the vernacular language of Northern India) with an admixture of Arabic and Persian words introduced by Mohammedan conquerors.

hist.: this qualification is applied to words or senses that are not now current, but are necessary to the understanding of what is written about the past.

N: Old Norse was the language of Norway and its colonies to the 14th century.

pop.: senses thus qualified are to be understood as based on widespread misapprehension of the word's proper meaning.

pred., pred. a.: see attrib. above.

Rom.: the Romance or Romanic languages are those developed out of Latin—Italian, French, Spanish, Portuguese, Provençal, &c.

Scand.: the Scandinavian languages include Icelandic, Norwegian, Swedish, and Danish.

Teut.: the Teutonic family of languages includes Gothic, Scandinavian, Frisian, English, Dutch (Flemish), and German.

vulg.: the qualification implies that the use of the word or sense (except on occasions justifying departure from custom) is due either to want of education or to want of manners.

AMERICAN OXFORD DICTIONARY

A[1], **a,** letter & n. (pl. *As,* A's). (Mus.) sixth note in scale of C major; (Alg.; *a*) first known quantity (cf. B, C, X, Y, Z); (in argument, &c.; A) first hypothetical person &c. *A1* (ā wŭn), (in Lloyd's register, of ship) first-class, (colloq.) first-rate, excellent.

a[2], **an**[1], (*a, an*; emphat., ā, ăn), adj. (*an* before silent h- & vowels except ū-, eu-, ew-, & *one*; otherwise *a*; but some still write *an* before h- in unstressed syllable, as *an historian*). One but no matter which (used before the sing. of most common nn. having ordinary plural unless *the* or other defining adj. precedes or might, as e. g. in *shut up shop,* precede; when there is also another adj., or adv. & adj., *a* or *an* precedes it or them, as *a fine, a gloriously fine, day*; but it follows *many, such, what* excl., & any adj. preceded by *how, so, as,* or *too,* as *what a blessing!, many a long day, how different a fate!, too serious a matter,* & is usu. placed between *quite* & *rather* & their adjj., as *quite a good hat, rather a queer fellow*); one of the name —, person or thing having the qualities &c. of —, (*there was a Jones at Harvard*; *a Mrs Smith deposed that . . .*; *is a Hercules, an Armageddon, a tiger when roused*); any or every (*I love a good liar*); in one & no more, (emphat.) in the singular, (*costs a penny; a yard long*; *a dozen, hundred, few, great many,* &c., used as numeral adj., or as nn. followed by *of*; *I said* ā *hat,* ăn *egg,* i. e. not *hats, eggs*); the same (*all of a size*); each (*$40 a year*; *5c. a dozen*); (emphat.) one but not the desired (*Yes, I had* ā *reply*). [*one*]

a[3], prep. On, to, in, (now chiefly as pref. in *abed, afoot,* &c., or with vbl noun in *-ing,* as *go a hunting, house is a-building*; & the origin of A[2] = each). [*on*]

ā[4], prep. in L phrr. ***ā fortiōr'ī,*** with stronger reason, more certainly. ***ā mēn'sā ĕt tō'rō,*** from board and bed. ***ā pōstĕriōr'ī,*** from effect to cause, inductive(ly). ***ā priōr'ī,*** from cause to effect, deductive(ly); (loosely) presumptive(ly). [L]

à[5], prep. in F phrr. ***à deux*** (see Ap.), for two, between two. ***à fond*** (see Ap.), thoroughly. ***à huis clos*** (ah wē klō), with closed doors, in private. ***à la,*** after the manner of, in the — manner, (*à la Russe, à la Reform*). ***à la carte*** (ah lah kärt), by the bill of fare. ***à la mode*** (ah lah mōd), in the fashion. ***à outrance*** (see Ap.), to the death. [F phrr.]

Aar'on (ār-), n. *A.'s beard, rod,* kinds of plant. [bibl. person]

ăb, prep. in L phrr. ***ăb ĕx'trā,*** from outside. ***ăb ĭnĭt'iō,*** (of tedious narrative) ***ăb ōv'ō,*** from the beginning. ***ăb ŭr'b'ĕ cōn'dĭtā,*** from Rome's foundation (*A. U. C. 700,* B. C. 54). [L]
